

SOLICITOR-LED DATA PROTECTION AUDITS FOR UK ORGANISATIONS

Data Protection Audits

How compliant is your organisation?

An independent, evidence-based view of your current position — and a prioritised plan to address the gaps.

WHAT YOUR WDPS AUDIT WILL ANSWER

A WDPS audit assesses what is documented, how data protection controls operate in practice and which improvements should take priority.

WHAT YOU WILL RECEIVE

COMPLIANCE OVERVIEW**DETAILED AUDIT REPORT****PRIORITISED ACTION PLAN****MANAGEMENT BRIEFING**

WHY WESTBROOK DATA PROTECTION SERVICES LIMITED?

Your audit is led by an experienced data protection solicitor from initial scoping through to the final report and recommendations. You receive clear, proportionate advice shaped around your organisation's risks, resources and priorities.

01 Where do we stand?

We assess each agreed area against the relevant data protection requirements. You will see what is working, where controls need strengthening and where compliance gaps remain

02 Are our controls working in practice?

We review policies, records and supporting evidence and speak to the people responsible for applying them. This shows whether documented processes are understood, followed and effective in day-to-day practice.

03 Which gaps require attention?

Findings are assessed by risk and significance. Senior management can distinguish matters requiring prompt action from improvements that can be addressed as part of a longer-term programme.

04 What do we need to do next?

You receive practical recommendations in priority order. The resulting roadmap provides a clear basis for assigning ownership, resources and timescales.

Book an audit scoping discussion

WDPS provides practical, risk-based audits with clear findings and a prioritised action plan.
